

Xcdify Order Management System

Introducing a powerful, AI-driven order management platform designed for multi-company operations. Streamline sales, approvals, and inventory with a user-friendly, scalable solution.

The Challenge: Complex Order Management

Managing orders across multiple companies is often slow and error-prone. Manual quote creation, approval delays, and limited visibility create inefficiencies, compliance risks, and lost sales opportunities.

Our Solution: Unified Order Management

Centralize orders, quotes, inventory, and customer data across all companies in one platform. Enable seamless approvals, automated notifications, and real-time dashboards for faster decisions and complete visibility.

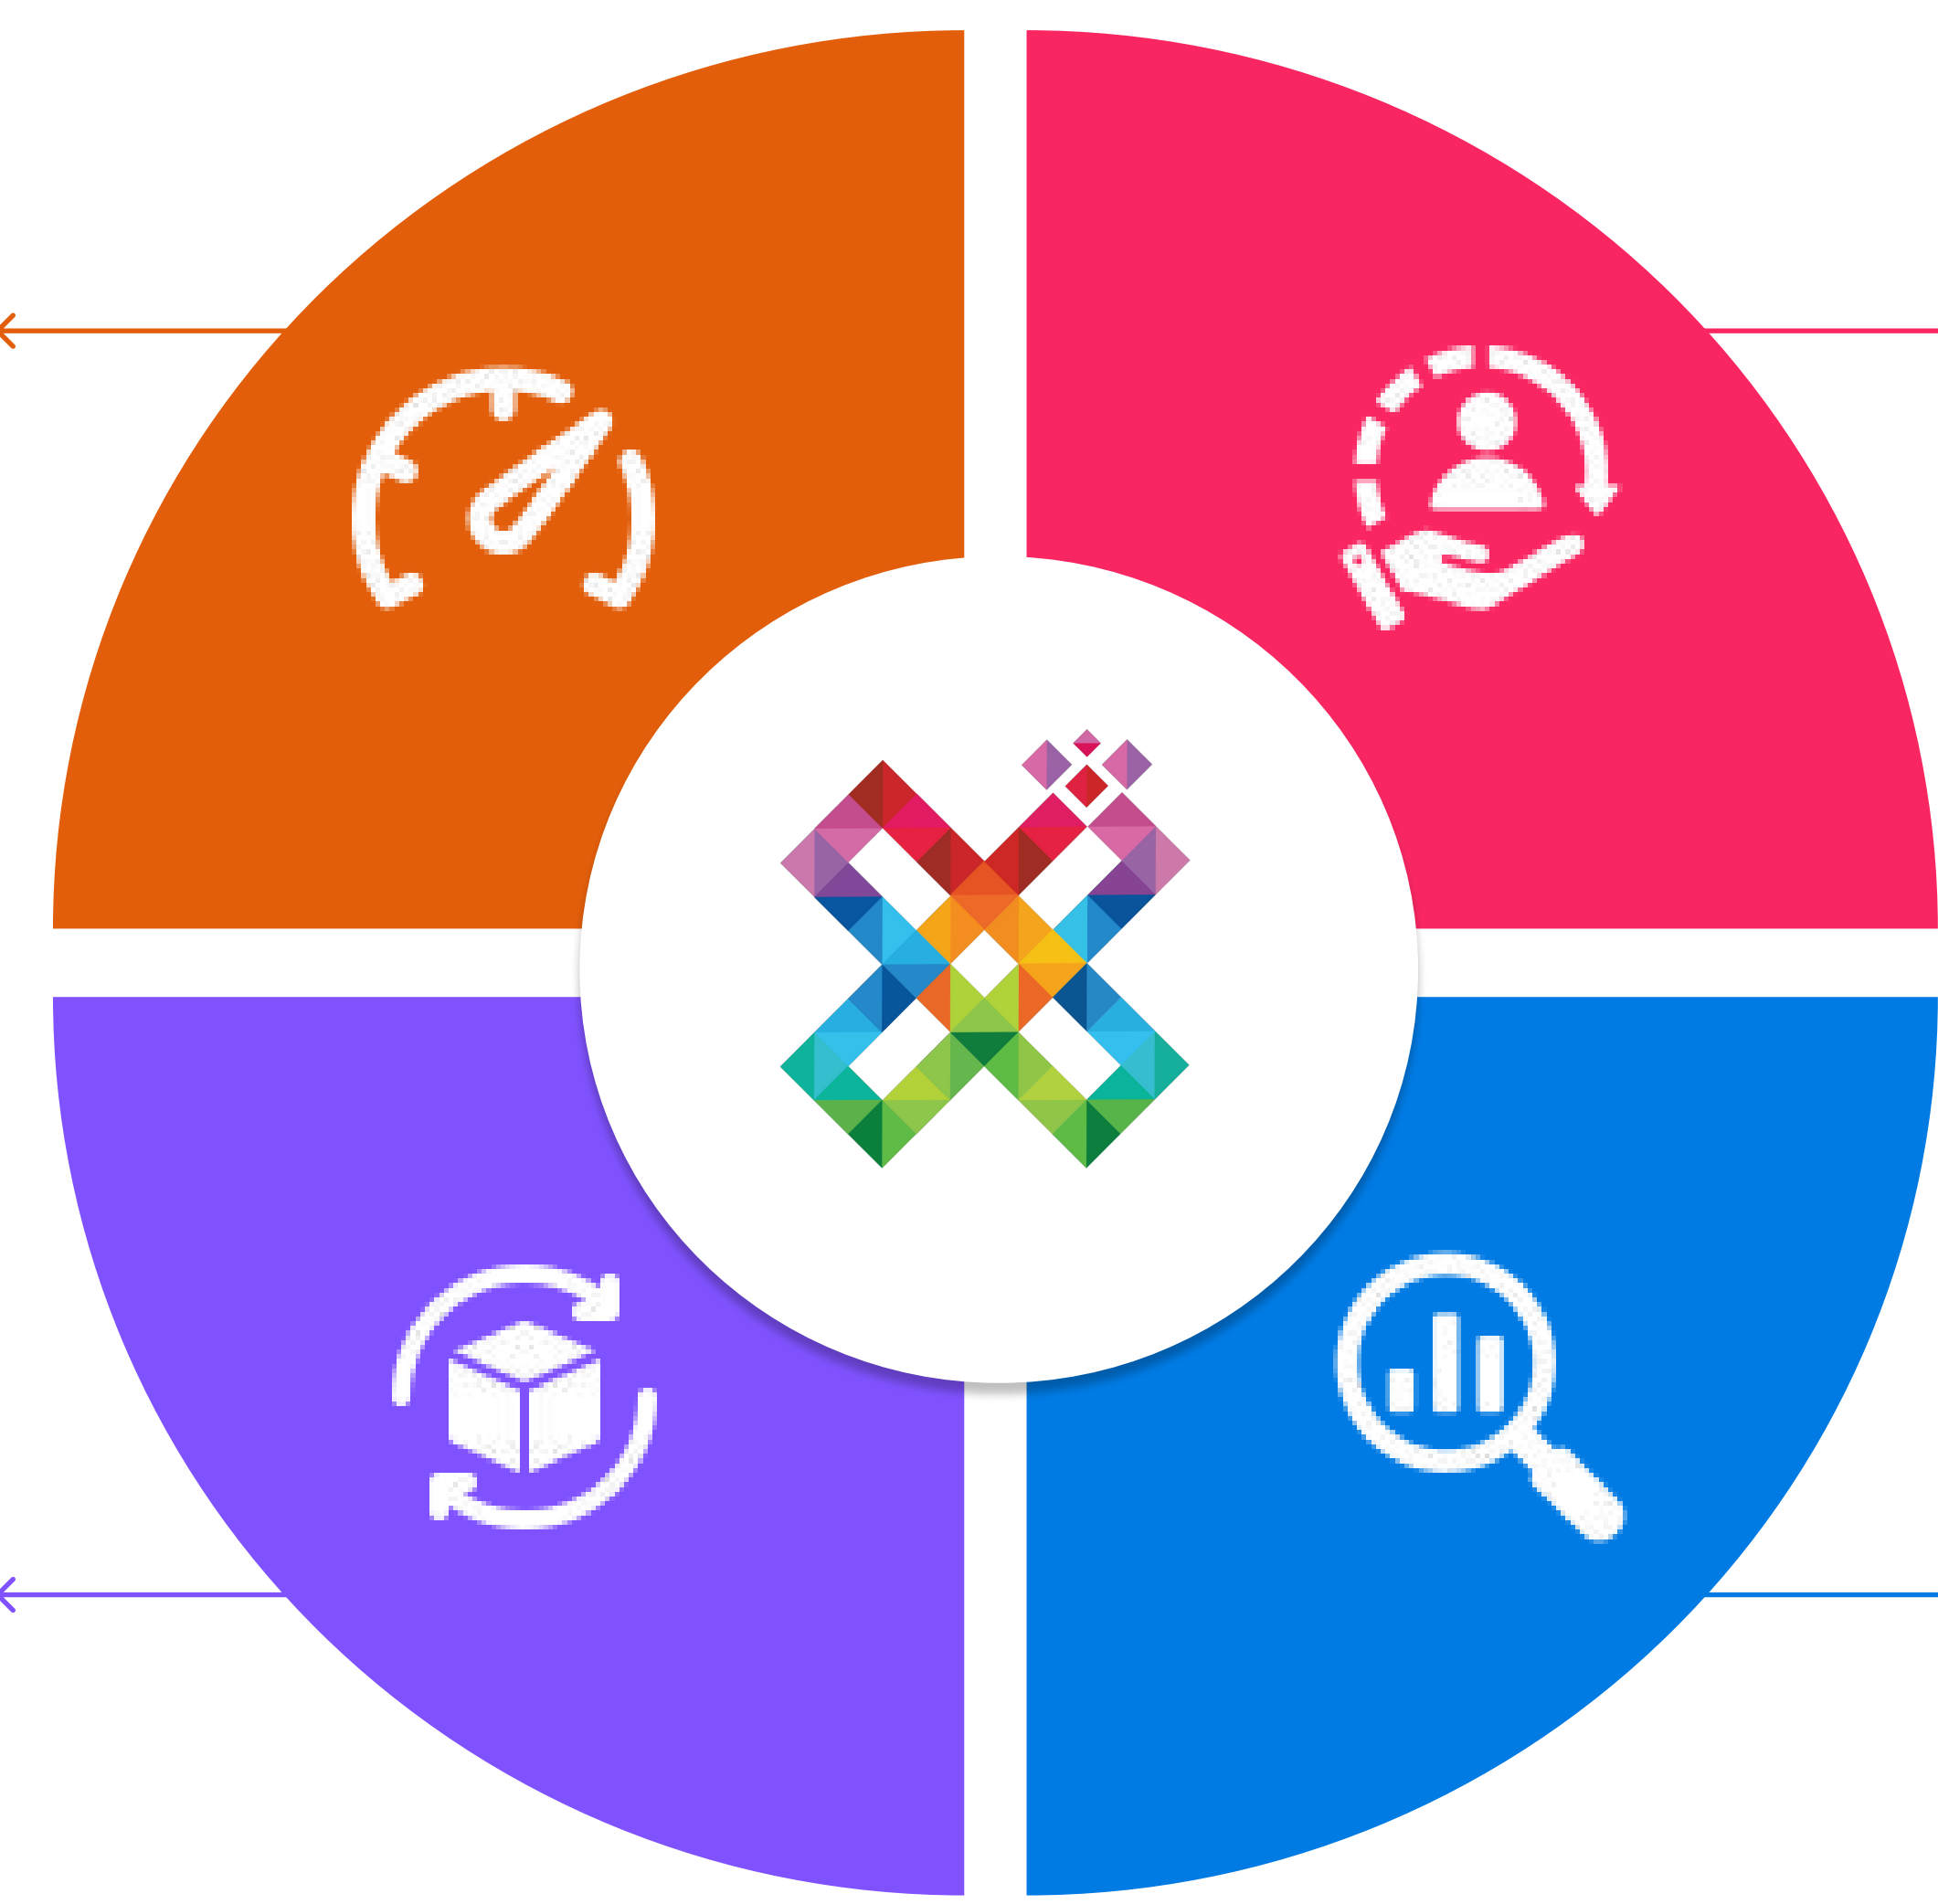

Key Features & Modules

Dashboard

Gain real-time insights into orders, inventory, and team performance with a customizable dashboard.

Inventory

Track product availability and manage stock efficiently to avoid shortages or overstocking.

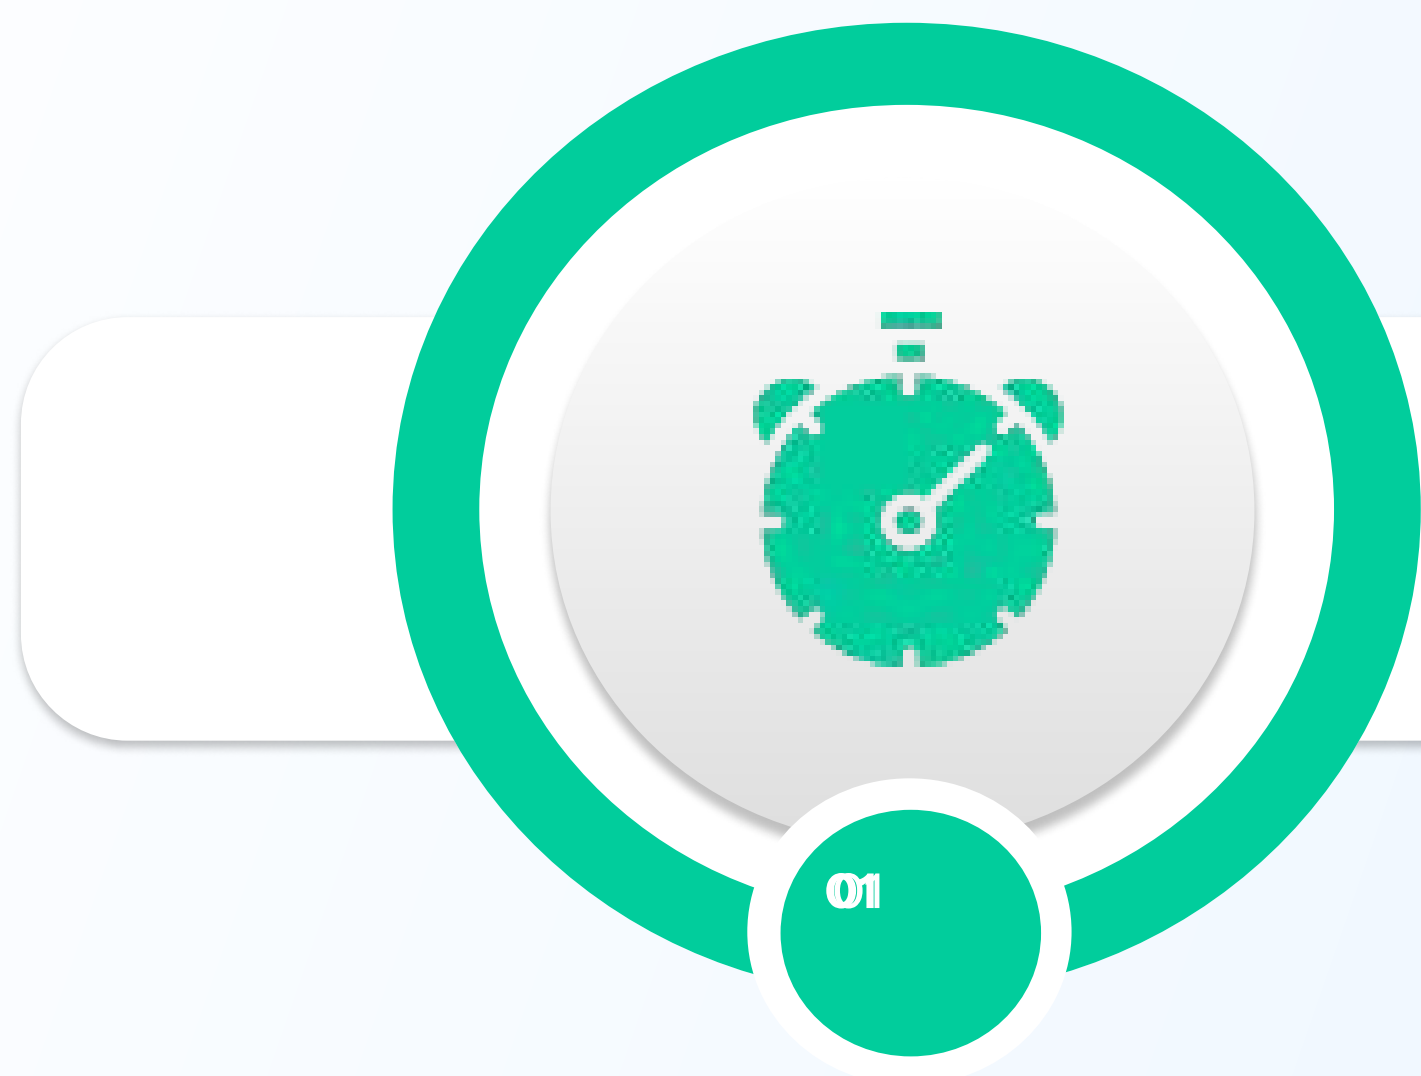

Party Management

Centralize all customer data for every company, making it easy to manage relationships and track activity.

Reports

Generate actionable reports for sales, inventory, and approvals to drive smarter decisions.

Business Benefits

Faster Sales Cycles

Accelerate quote creation and approvals with streamlined workflows.

Improved Visibility

Gain complete, real-time insight across companies, teams, and transactions.

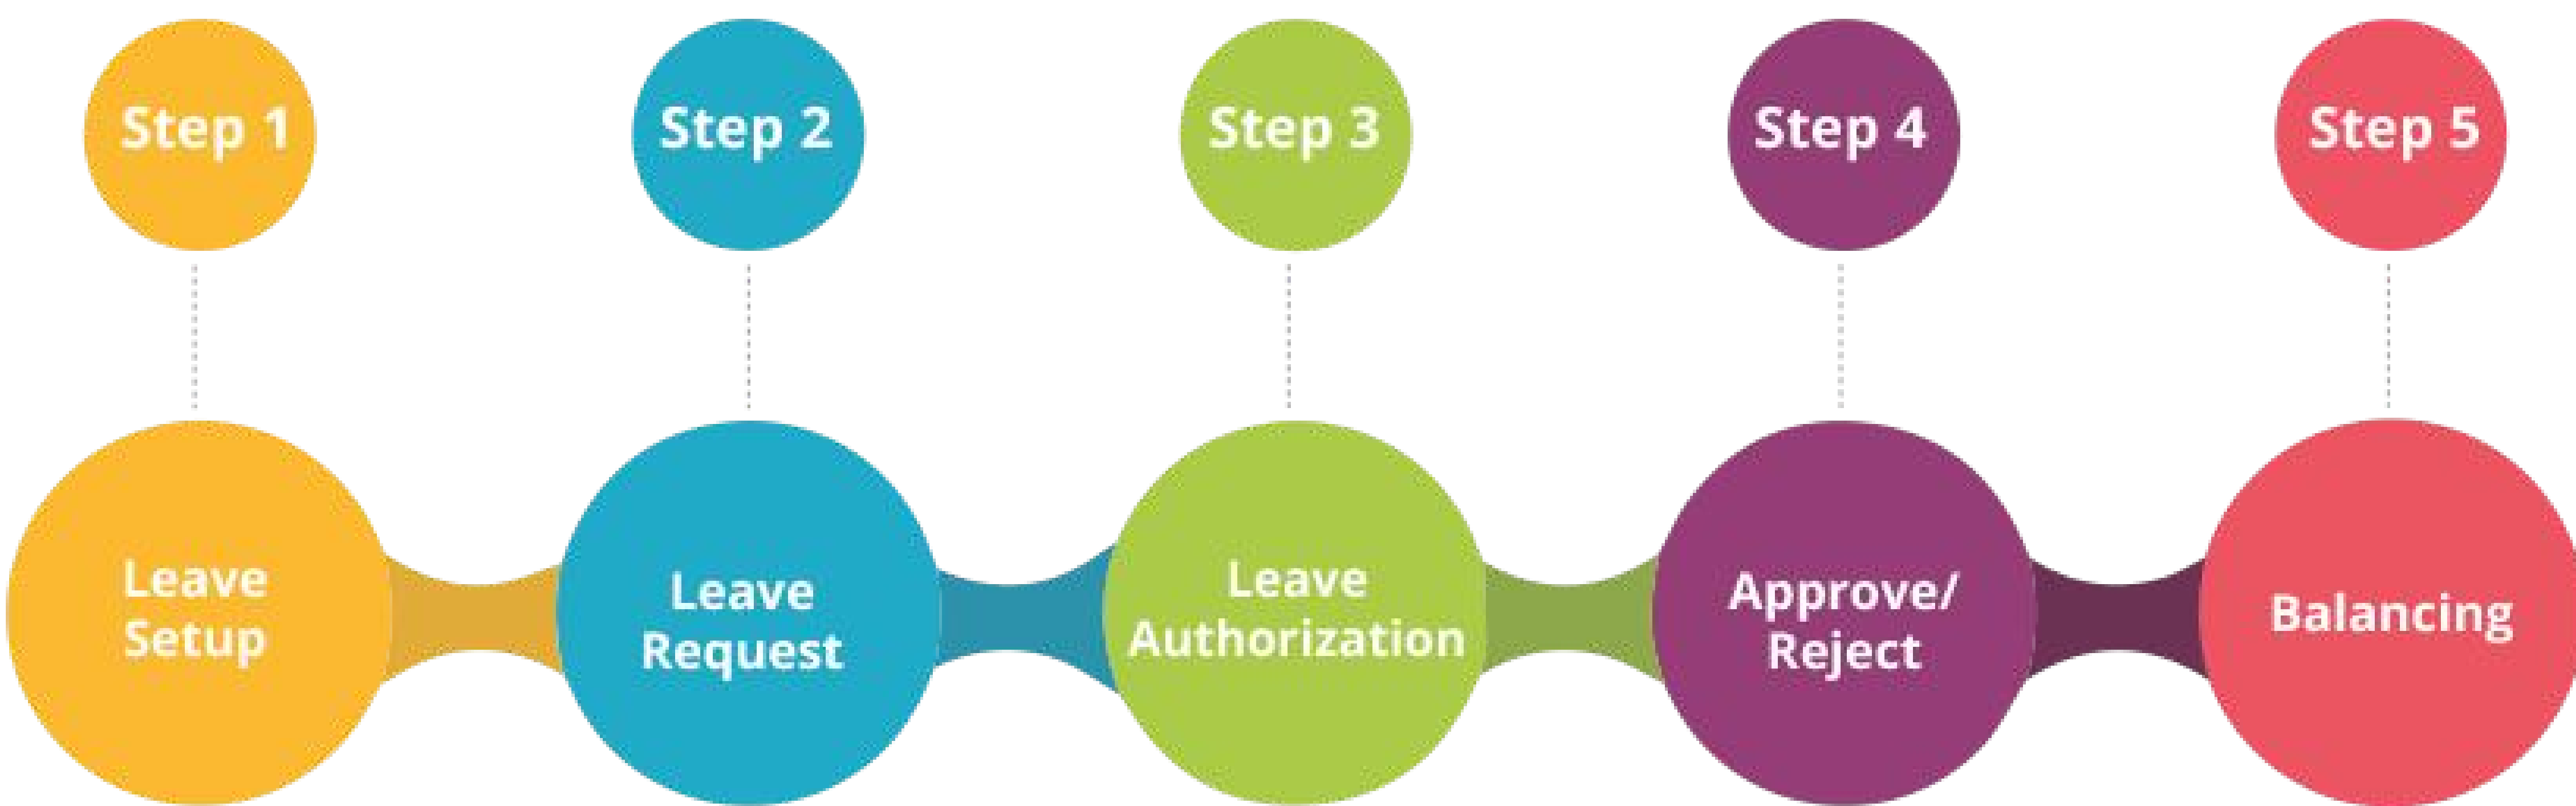

Enhanced Compliance

Minimize errors and ensure transparency with automated audit trails.

Robust Approval Workflow

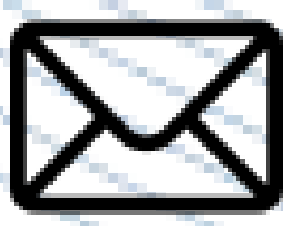

A customizable organization hierarchy ensures quotes are approved by the right people. Approvers can edit quotes, add terms, and apply discounts before final approval. Every action is tracked with audit trails and approval history for full compliance and transparency.
